**How to use this revision planner:**

This revision planner maps out all of your revision for the weeks leading up to your next round of mock exams. You will use your revision guides for this.

At least one to two hours should be completed afterschool each evening, and at least 3hrs on Saturdays and Sundays. This is the bare minimum you should be working to, so complete all of the subjects shown in blue font, and ideally all of those in red. The dark red font is used for optional extra revision.

I have set aside one evening per week to have as a rest day after half term. I have used Friday for this, however you could swap it to any day that you prefer, as long as you then complete that day's revision on the Friday instead. For Options subjects, revise the subject that you have in that option block. For example, if you have French is Option B, revise French. If you don't have a mock exam subject in that option block, revise Maths or English Literature instead.

As you work through, day by day, tick off the subjects you have been revising. This will give you a sense of achievement and make you feel more confident when you go into your exams – mocks and the real thing!

Everyone knows that there is a direct link between the amount of time you dedicate to revision and the results that you get afterwards. However, for revision to be effective you need to be able to concentrate and focus properly, so any time spent revising should be without distraction – no TV, mobile phone, music/air pods, games consoles, social media, and so on. Things like this will distract you and will diminish the revision you are completing. If you find it too difficult to not look at your phone, try downloading an App called Flora or IMyFish—Focus Keeper. They really help!

**So, if you are giving up your time to revise, make it as focused and effective as possible!!**

**After school Teacher-led Revision & Coursework Support Sessions**

These sessions are drop in revision sessions, led by your class teachers and subject leaders. You are welcome to attend as many as you would like, and there is no pre-sign up required. Just turn up on the day. However, with all of these sessions available to you, I would recommend attending as many as possible, and especially attending the subjects offered that you need additional support in or need additional coursework completion time.

Saturday Sessions are by invitation only. Students will be advised of their invitation by their teacher and parents/carers will receive notification of the sessions their child is invited to by Parentmail.
